

Week 1 Revision Notes

Day 1 — Number System

Types of Numbers

- Natural: 1,2,3... | Whole: 0,1,2... | Integer: ...-2,-1,0,1,2...
- Prime: divisible by 1 and itself only
- Composite: more than 2 factors
- 1 is neither prime nor composite

Divisibility Rules

Divisible by	Rule
2	Last digit even
3	Sum of digits $\div 3$
4	Last 2 digits $\div 4$
5	Ends in 0 or 5
6	Divisible by both 2 and 3
8	Last 3 digits $\div 8$
9	Sum of digits $\div 9$
10	Ends in 0
11	Difference of alternating digits = 0 or 11

Prime Numbers up to 50 2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47

How to check Prime: Test primes 2,3,5,7,11,13... until you exceed $\sqrt{N}$. No factor found = Prime.

Day 2 — Number Series

6 Patterns

Pattern	Example	Logic
Addition	2,5,8,11,? $\rightarrow$ 14	+3 each time
Subtraction	50,44,38,? $\rightarrow$ 32	-6 each time
Multiplication	3,6,12,24,? $\rightarrow$ 48	$\times 2$ each time
Division	625,125,25,5,? $\rightarrow$ 1	$\div 5$ each time
Squares	1,4,9,16,? $\rightarrow$ 25	$1^2, 2^2, 3^2, \dots$
Cubes	1,8,27,64,? $\rightarrow$ 125	$1^3, 2^3, 3^3, \dots$

Two Step Series — Most Important

- Find differences between numbers
 - Find pattern inside differences
 - Example: 2,3,5,9,17,? → differences 1,2,4,8 → doubling → next diff=16 → **33**
-

Day 3 — Banking Awareness

Types of Banks

Type	Example
Central Bank	RBI
Public Sector	SBI, PNB, Canara
Private Sector	HDFC, ICICI, Axis
RRB	Karnataka Gramin Bank
Payments Bank	Airtel, Paytm — no loans
Small Finance	AU, Equitas
Foreign	Citibank, HSBC

RBI Key Facts

- Established: 1st April 1935
- Nationalized: 1st January 1949
- HQ: Mumbai
- Governor: Sanjay Malhotra
- ₹1 coin = Ministry of Finance, not RBI

Key Rates

Rate	Value	Meaning
Repo Rate	6.25%	RBI lends to banks
Reverse Repo	3.35%	RBI borrows from banks
CRR	4%	% deposits kept as cash with RBI
SLR	18%	% deposits in gold/govt securities
Bank Rate	6.50%	Long term RBI lending

Bank Nationalization

- 1969 → 14 banks → Indira Gandhi
- 1980 → 6 more banks

Key Terms

Term	Meaning
NPA	Loan unpaid for 90+ days
RTGS	Above ₹2 lakh, instant

Term	Meaning
NEFT	No minimum, not 24/7
IMPS	24/7, any amount, any day
KYC	Identity verification

Day 4 — LCM & HCF

HCF = Largest number dividing two numbers exactly

- Take **common** prime factors, lowest power
- Use when: cutting into equal parts, largest tile, dividing equally

LCM = Smallest number divisible by both numbers

- Take **all** prime factors, highest power
- Use when: bells ringing together, meeting again, smallest number divisible by both

Golden Rule — Never Forget

$HCF \times LCM = \text{Product of two numbers}$

When to use which

Situation	Use
Largest tile/box	HCF
Bells ringing together	LCM
Cutting into equal parts	HCF
Smallest number divisible by both	LCM

Day 5 — Coding Decoding

4 Types

Type	Logic	Example
Letter Shift	Each letter shifts +/- fixed number	CAT+3=FDW
Reverse Coding	Position = 27 minus original	A=Z, B=Y
Word Coding	Match repeated words to repeated codes	is=5
Number Coding	Letters replaced by numbers per rule	A=1, B=2

EJOTY Rule — Memorize E=5, J=10, O=15, T=20, Y=25 Calculate any letter position from nearest EJOTY value.

Key Rule: Always verify pattern with 2-3 letters before answering.

Day 6 — Reading Comprehension

3 Minute RC Method

1. Read first paragraph fully
2. Read last paragraph fully
3. Read first line of each middle paragraph
4. Read questions first
5. Scan for answers — don't re-read fully

5 Question Types

Type	Strategy
Main Idea	First + last paragraph
Direct Fact	Scan for keyword
Inference	Only what passage says — nothing extra
Vocabulary	Replace with your own word first
Negative/EXCEPT	Eliminate what IS mentioned

Golden Rules

- Inference = never go beyond passage
- Vocabulary = context over dictionary
- Negative Q = eliminate confirmed options
- Time per RC = 8-10 mins max

Quick Fire — Most Important Points

Must memorize before mock test:

- 1 is neither prime nor composite
- Payments Banks = no loans
- ₹1 coin = Ministry of Finance
- 1969 = 14 banks, 1980 = 6 banks
- $HCF \times LCM = \text{Product of numbers}$
- EJOTY = 5,10,15,20,25
- RTGS minimum = ₹2 lakh
- IMPS = 24/7 including holidays
- Repo = RBI lends, Reverse Repo = RBI borrows
- CRR = cash, SLR = securities
